**DETAILED ACTION**

***Response to Arguments***

Page 11, section III:

The 101 rejections of claims 6 and 7 are hereby withdrawn with respect to the amendments to the claims.

The remaining arguments are moot as the application is in the process of being allowed.

***Allowable Subject Matter***

Claims 1-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The newly added claim limitation, found in independent claims 1, 5, 6 and 7, of creating a table listing about each program to be broadcast in a time slot has not been found in the previously cited prior art.

While this limitation can be found in the prior art, this limitation has not been found in the context of the other limitations found in the claims. Specifically, the claims refer to a system for acquiring and extracting data about alternative programs being aired during the same time as the current program being shown on the display device. These alternative programs are displayed on a portable device, using a format tailored for the device. The displayed programs are referenced by the table created in the new limitation. Additionally, the previously rejected limitations are rejected using 5

Art Unit: 2424

references, and addition of an additional reference would be considered a piecemeal rejection of the claims. Therefore the claims are considered allowable over the prior art.
